Where Children's Creativity Comes Alive

Children's paper drawings become interactive characters in the browser, starting in Indonesia.

For children aged 3–10

Creativity Often Stops at the Paper

Children love drawing and coloring, but once the page is finished, the moment ends. Many screen-based activities are designed around watching and swiping rather than creating.

On paper

Creative and hands-on, but it ends when the page is done.

Create → Finished → Stop

On screens

Engaging, but children mostly watch instead of make.

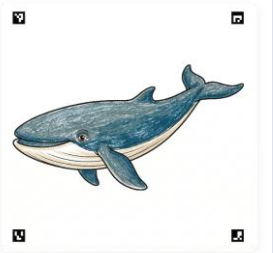

Watch → Swipe → Watch

What if a child's own drawing became the starting point of play and learning?

Solution: Paper Comes Alive

Children color a printed sheet, scan it through the website, and watch their own artwork become an animated character with sound, motion, and short educational content.

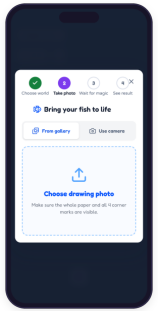

1

Color

Kids color a Scanvas paper sheet

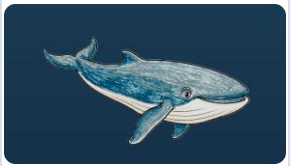

2

Scan

Snap or upload a photo in the browser

3

Come Alive

The artwork comes alive in seconds

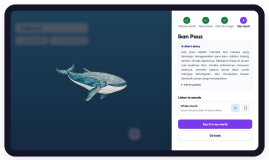

4

Explore

It swims inside a living world

5

Learn

A short story, sounds, and facts

Alive in the world

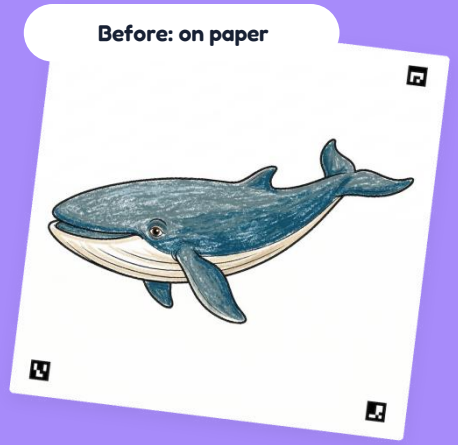

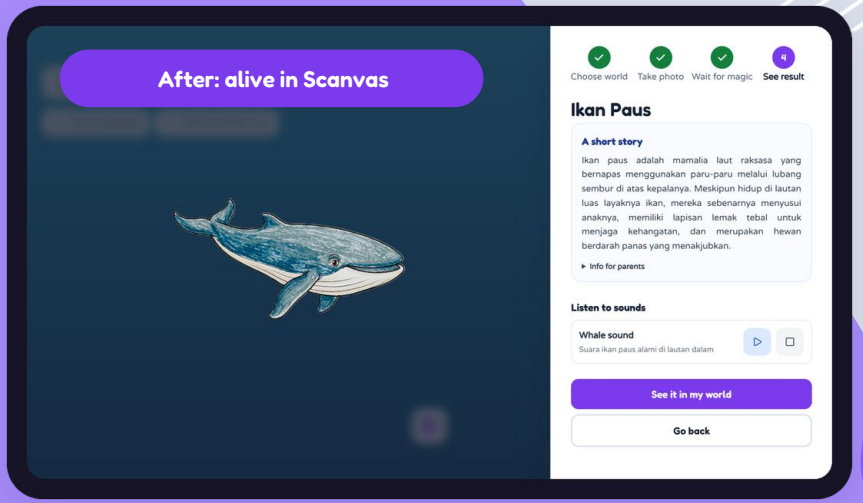

Their Creation. Their Character.

Unlike generic videos or static worksheets, Scanvas makes the child's own colored artwork the center of the digital experience.

Product & Technology Edge

1 Computer-Vision Scan

Four printed markers guide perspective correction, cropping, and masking of the photo.

3 Code-Linked Sheets

Each printed sheet carries a unique access code tied to its template.

2 Personalized Animation

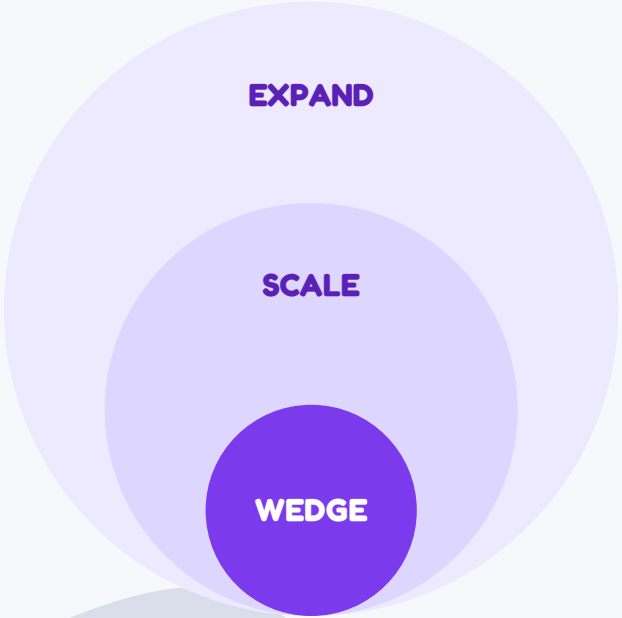

The extracted artwork, not a stock character, is animated in the world.

4 Reusable Content Engine

New worlds are new sheet templates plus world assets on the same pipeline, so content scales without rebuilding the product.

Market: Start With a Clear Wedge

Start where we already pilot, scale through schools, then expand across Southeast Asia.

WEDGE

Indonesia initial wedge

TK/PAUD, TPA, children activity providers, and families with kids 3–10

Where we already pilot: 30 children in our first TPA

SCALE

Indonesia schools & events

Schools and event organizers running creative sessions

Distribution through Scanvas Studio

EXPAND

Southeast Asia

Family learning and creative-play market across the region

New worlds and languages on the same engine

Demand → Distribution → Retention

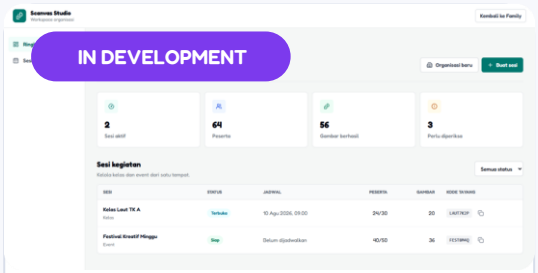

B2C · VALIDATES DEMAND

Families

Creative packs let us validate family demand directly.

Revenue model
Per-pack purchase

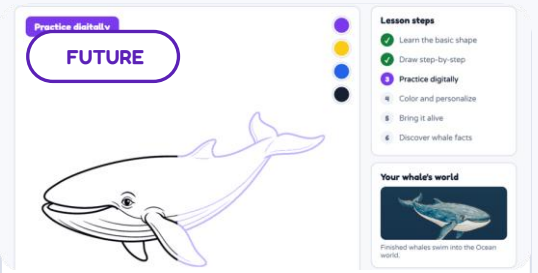

B2B · SCALABLE DISTRIBUTION

Schools & Events

Scanvas Studio runs sessions for many children at once: bulk processing, shared screens.

Model under validation
Per session / per participant

RETENTION · LIFETIME VALUE

Learning Content

New worlds and learning activities bring children back again.

Potential model
Subscriptions and content add-ons

Traction & Next 9 Months

Early validation

✓ Live product · 2 worlds · scan-to-animation working

30	1	5
children in first TPA pilot	real-world pilot (TPA)	improvements from feedback

Built → tested → learned → shipped

Shipped	Larger world for more creations
Shipped	Digital trial before purchase
In progress	Bulk drawing uploads
In progress	Learning space after play (Next stage)
In progress	More worlds, e.g. a land version

1

MONTH 1–3

Prove Demand

Turn the TPA pilot into paid sessions with more schools and TPA/PAUD.

2

MONTH 4–6

Prove Distribution

Studio and bulk uploads for repeatable school and event sessions.

3

MONTH 7–9

Seed-Ready

Learning layer live; repeat-usage and revenue data for a seed round.

Vision: From Magic Moment to Learning Platform

Today, Scanvas uses the child's creation to trigger curiosity and discovery. Next, we build structured learning and a growing library of worlds.

CURRENT · LIVE

Color → Scan → Alive

Today's magical coloring experience.

NEXT

Create → Explore → Story → Quiz

An interactive learning layer with stories, guided questions, and simple quizzes.

FUTURE

Learn → Practice → Create → Bring It Alive

Digital drawing classes and a content library of worlds, from Indonesia to the region.

The Team Behind Scanvas

Haikal Hilmi

CEO & Co-Founder

Technical founder · product & company strategy · partnerships · built the core technology

Salsabila Khoirunnisa

CMO & Co-Founder

Brand · marketing · customer discovery · community · go-to-market

> **A technical CEO who built the core product, and a CMO who brings it to families and schools.**

We shipped the live product and ran our first pilot.

The Ask

Seeking

Antler pre-seed investment

To make a live, piloted product repeatable

Where it goes

- Product & scan reliability
- Go-to-market: schools, TPA, events
- Learning layer & new worlds
- Team to ship faster

What this unlocks in 9 months

1. Paid sessions with more schools and TPA/PAUD
2. Families buying packs repeatedly
3. Scanvas Studio for sessions live
4. Learning layer (Next stage) launched
5. Seed round with repeat-usage data

Why Antler: prove traction fast in the Jakarta residency, then scale from Indonesia to the region.
