Parents and Schools Need Creative Activities That Are Easy to Run and Worth Repeating

PARENTS

NEEDS

A creative activity they can easily accompany at home, that their child wants to do again.

TODAY

Coloring ends with the page; screens offer ready-made characters to watch.

SCHOOLS & TPA

NEEDS

A group activity that is easy to run, engages every child, and fits a school budget.

TODAY

Teachers prepare materials themselves; digital options often need apps or devices per child.

WHAT WE OBSERVED IN THE PILOT

- ✓ 30 children participated in a color → scan → alive session at one TPA
- ✓ Feedback asked for a larger world, a trial before buying, and faster group processing

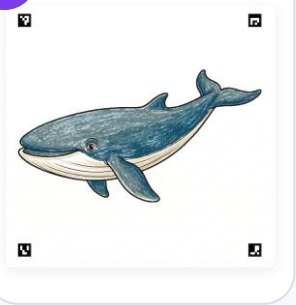

WHAT WE STILL ASSUME (TO VALIDATE)

- Parents pay for a repeatable creative activity
- Schools rebook sessions and later license a classroom format

The Child Creates First; Technology Extends What They Created

TRY THE LIVE DEMO

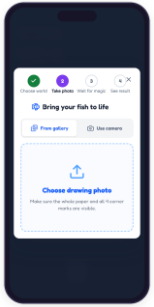

1

COLOR

Child colors a printed Scanvas sheet.

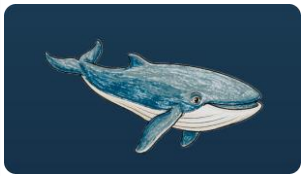

2

SCAN

Parent or teacher photographs it in the browser.

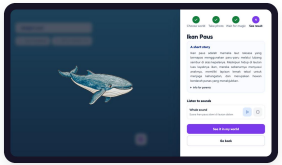

3

COME ALIVE

The child's own artwork is extracted and animated.

4

EXPLORE

It joins an interactive world with sound and facts.

- ✓ Ocean + Vehicle worlds
- ✓ No app installation
- ✓ Free digital trial

MONTHS 4–6

Studio MVP + 3-lesson pilot

- → Scanvas Studio MVP in ≥3 schools
- → Ocean Artist 3-lesson pilot
- → Real paid offer

Gate · 30 days, ≥30 children: ≥60% start lesson 2; ≥40% finish 3; ≥20% of parents pay

MONTHS 7–9

Lessons 4–10 (only if gate passes)

- → Ocean Artist Level 1 (10 lessons)
- → Course launch to pilot families
- → Rebooking offers to schools

Gate · 90 days: ≥50 paid courses; ≥20% of paying schools rebook

MONTHS 10–12

Scale what works

- → 48 paid sessions cumulative
- → 600 packs · 100 courses
- → 2 → 4 worlds

Year-1 target: Rp87.3M revenue; delivery cost per session measured

If a gate fails, we do not build the next layer: we fix the offer or the price first.

RESPONSIBLE CHILD DATA

Collect only what is necessary. No child name, parent identity, email, phone, precise location, or artwork itself as analytics payload by default.

VALIDATION PRINCIPLE

Build → Measure → Gate → Expand

Do not build the full course before a 3-lesson pilot validates progression and willingness to pay. Do not build large Mission/Story/AI layers before repeat usage is proven.

Appendix G · Course MVP: Ocean Artist Level 1 as a Learning Product

1	**Kenalan dengan Warna**	choose colors, experiment	A

LEARNING OUTCOMES

By lesson 10 the child chooses and combines colors on purpose, controls strokes, makes patterns and textures, and explains their own design choices.

AGE & ROLES

Main target 5–9 (to validate); 3–4 with an adult. Parent sets up and scans; teacher runs the classroom version. The child decides the final artwork.

HOW PROGRESS IS SEEN

A simple skill checklist per lesson, filled by parent or teacher, plus the child's artwork collection in My World, lesson by lesson.

WHY LEVEL 2

New skills that build on Level 1, and a portfolio that shows the child's growth; new characters are a bonus, not the reason.
