SCANVAS

Where Children's Creativity Comes Alive

Interactive digital culture for children: their own paper drawings become animated characters, worlds, and stories in the browser.

For children aged 3–10

Creativity Often Stops at the Paper

Printed coloring content ends when the page is finished. Most children's digital entertainment is designed to be watched and swiped, not created.

Printed content

Creative and hands-on, but it ends when the page is done.

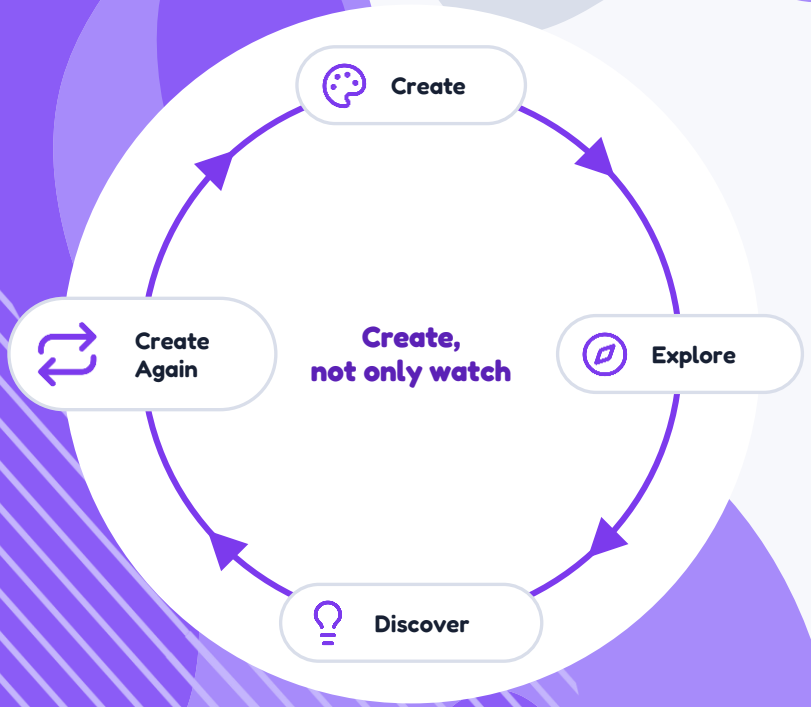

Create → Finished → Stop

Digital media

Engaging, but children mostly watch instead of make.

Watch → Swipe → Watch

What if a child's own drawing became their character in a digital world?

Children Should Create Digital Culture

Scanvas is built around a simple idea: children should use technology to create, explore, and discover, not only consume.

Create first
The story starts with the child's own imagination on paper.

Make it personal
Their artwork becomes the character, not a stock asset.

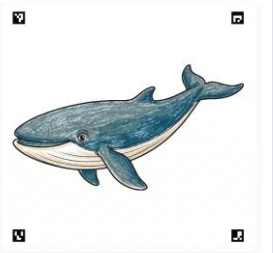

Interactive, not passive
Movement, sound, stories, and facts extend the play.

Keep access simple
Open it in a browser, with no app installation required.

From Paper to Interactive Worlds

Children color a printed sheet, scan it through the website, and watch their own artwork become an animated character with sound, motion, and story content.

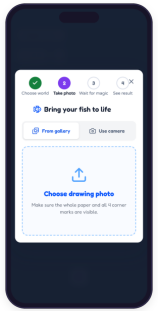

1

Color

Kids color a Scanvas paper sheet

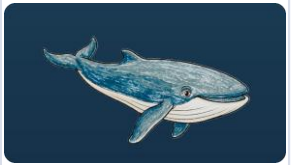

2

Scan

Snap or upload a photo in the browser

3

Come Alive

The artwork comes alive in seconds

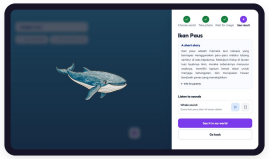

4

Explore

It swims inside a living world

5

Discover

A short story, sounds, and facts

Landing page

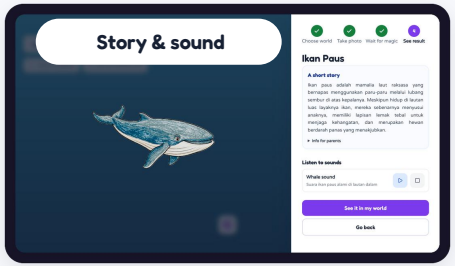

Scan / upload

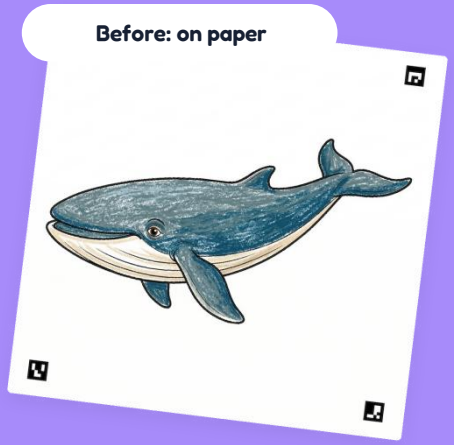

Alive in the world

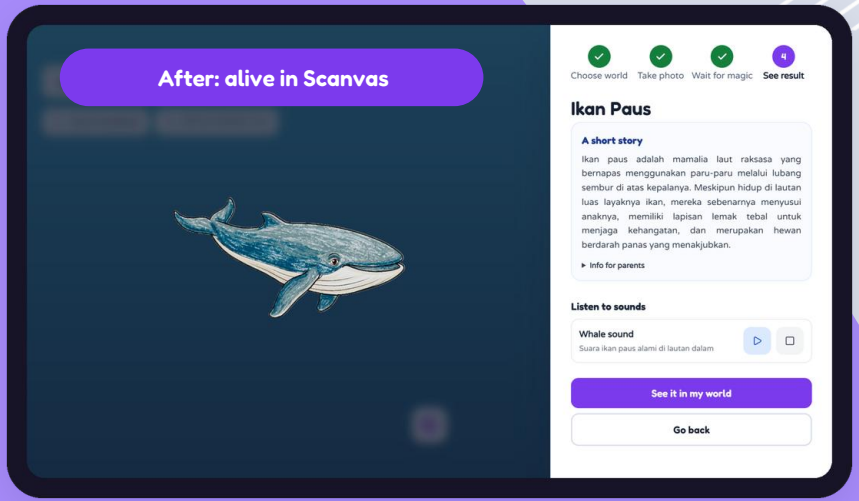

Their Creation. Their Character.

Unlike generic videos or static printed pages, Scanvas makes the child's own colored artwork the character of the digital experience.

Movement

Sound

Story & Facts

One Engine, Many Interactive Worlds

1 Computer-Vision Scan

Four printed markers guide perspective correction, cropping, and masking of the photo.

3 Code-Linked Sheets

Each printed sheet carries a unique access code tied to its template.

2 Personalized Animation

The extracted artwork, not a stock character, is animated in the world.

4 Reusable Content Engine

New worlds are new sheet templates plus world assets on the same pipeline: animals, vehicles, culture, and more.

From Magic Moment to Content Platform

Today, Scanvas turns a child's creation into an interactive character. Next, we build story and learning layers and a growing library of worlds.

CURRENT · LIVE

Color → Scan → Alive

Today's interactive coloring experience.

NEXT

Create → Explore → Story → Quiz

An interactive layer with stories, guided questions, and simple quizzes.

FUTURE

Learn → Practice → Create → Bring It Alive

Digital drawing classes and new content worlds, from nature to local culture and original Scanvas characters.

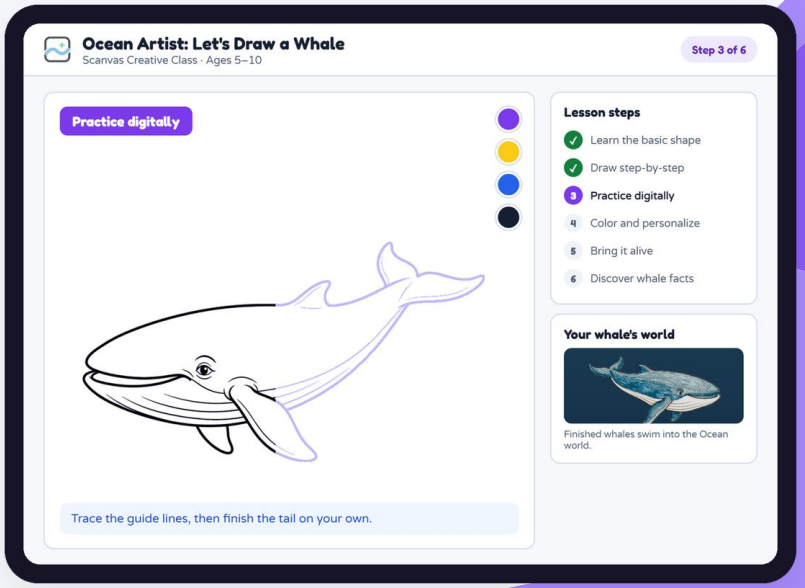

FUTURE ROADMAP · CONCEPT

Learn by Creating

Guided drawing classes that end inside a Scanvas world.

Example lesson **Ocean Artist: Let's Draw a Whale**

1. Learn the basic shape
2. Draw step-by-step
3. Practice digitally
4. Color and personalize
5. Bring it alive
6. Discover whale sounds, habitat, and facts

Core loop

Learn → Practice → Create → Experience → Discover

Who Pays: Families, Schools, and Events

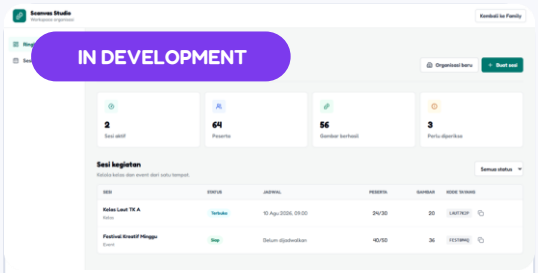

B2C

Families

Printed creative packs that unlock the Scanvas digital experience with a code per sheet.

Revenue model
Per-pack purchase

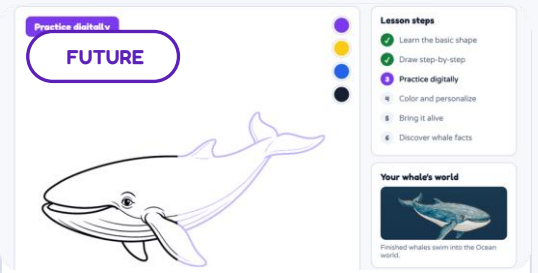

B2B

Schools & Events

Scanvas Studio for organized sessions, participant management, bulk processing, and shared screens.

Revenue model under validation
Per session / per participant / usage-based

B2C + B2B

Content Library

New worlds, character packs, creative classes, and licensed content collaborations.

Potential model
Subscriptions and content add-ons

Early Traction → What We Learned

Early validation

✓ Live product · 2 worlds · scan-to-animation working

30	1	5
pilot participants	real-world pilot (TPA)	improvements from feedback

Feedback already changed the product

Shipped	Larger world for more creations
Shipped	Digital trial before purchase
In progress	Bulk drawing uploads
In progress	Story & learning space after play
In progress	More worlds, e.g. a land version

1

PHASE 1

Validate the Magic

Improve scan reliability; grow from 1 TPA pilot to more families and schools.

2

PHASE 2

Build the Layers

Stories, quizzes, guided creative lessons, session tools for schools.

3

PHASE 3

Scale Content

World library, Scanvas Studio, partnerships, and regional content.
